

Atty Docket No. JCLA11476-R

Serial No. 10/695,018

**In The Drawings:**

Please amend Figures 1A and 1B according to the replacement drawings as attached herewith.

Atty Docket No. JCLA11476-R

Serial No. 10/695,018

**REMARKS****Present Status of the Application**

This is a full and timely response to the outstanding final Office Action mailed on June 30, 2004. The Office Action has rejected claims 1-19 under 35 U.S.C. 102(e) as being participated by and 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA).

Claims 1, 9, 14, 16-17 have been amended to provide clarity and to correct editorial error. Upon entry of the amendments in this response, claims 1-19 remain pending in the present application. Support for the claim amendments can be found in the specification. It is believed that no new matter has been added to the application by the amendments made to the claims or otherwise in the application.

The Applicants have most respectfully considered the remarks set forth in this Office Action. Regarding the anticipation and obviousness rejections, it is however strongly believed that the cited references are deficient to adequately teach the claimed features as recited in the amended claims. The reasons that motivate the above position of the Applicants are discussed in detail hereafter, upon which reconsideration of the claims is most earnestly solicited.

**Discussion of Drawings Objection**

*The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference characters not mentioned in the description.*

Atty Docket No. JCLA11476-R

Serial No. 10/695,018

In response thereto, Applicants have amended Figures 1A and 1B to eliminate the reference characters that were not described in the specification. Withdrawal of the objection is respectfully requested.

**Response to 35 U.S.C. 102 & 103 rejection**

*Claims 1-5, 7-9 and 11-19 are rejected under 35 U.S.C 102(e) as being anticipated by Applicant's Admitted Prior Art (AAPA)*

*Claims 6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over the AAPA.*

Applicants submit that independent claims 1, 9, 14 and 17 patently define over the AAPA for at least the reason that the cited art fails to disclose each and every feature as claimed in the present invention. Especially, the structure comprises at least a first conducting wire having two ends physically connected and thus electrically connected to one of said plurality of die pads and one of said electrodes, respectively. As clearly illustrated in Figure 1, the AAPA teaches two ends of each conducting wires 134, 136 are electrically and physically connected to one of the die pads 126 and its corresponding ground pad 114 and power pad, respectively. Therefore, the AAPA fails to render claims 1, 9, 14 and 17 of the present invention anticipated.

With regard to the 103 rejections of claims 6 and 10 by AAPA, Applicants respectfully submit that these claims defined over the prior art references for at least the reasons discussed above.

For at least these reasons discussed above, Applicants respectfully assert that AAPA fails to render claims 1, 9, 14 and 17 anticipated or unpatentable. Since claims 2-8, 10-13, 15-16

**Atty Docket No. JCLA11476-R**

**Serial No. 10/695,018**

and 18-19 are dependent claims which further define the invention recited in claims 1, 9, 14 and 17, respectively, Applicants respectfully assert that these claims also are in condition for allowance. Thus, reconsideration and withdrawal of this rejection are respectively requested.

Serial No. 10/695,018

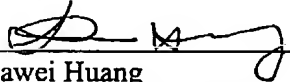

**CONCLUSION**

For at least the foregoing reasons, it is believed that the presently pending claims 1-19 are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.
